The investor is about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

This product is a Swiss Uncertificated Security under Swiss law.

Objectives

Objective of the product is to provide the investor with a specified entitlement according to predefined conditions. The investor may receive a coupon payment on the Coupon Payment Date if a Coupon Trigger Event has occurred on the corresponding Coupon Observation Date. If the investor has not received a coupon payment on the previous Coupon Payment Date(s), the missed coupon payment(s) shall additionally be payable in arrears if a Coupon Trigger Event occurs on a subsequent Coupon Observation Date (“Memory Coupon”). A Coupon Trigger Event shall occur if on any Coupon Observation Date the official close of each Underlying is above its Coupon Trigger Level. The product has a fixed lifetime and will be redeemed on the Early Redemption Date or on the Redemption Date. The possibilities for the redemption of the product are as follows:

Early Redemption on the specific Early Redemption Date:

Provided that on one of the pre-defined Autocall Observation Dates the official close of each Underlying is above its Autocall Trigger Level, an Early Redemption will occur and the product will expire immediately.

The investor will receive EUR 1'000.00 (100% of the Denomination) plus the Conditional Coupon Amount, if applicable, for the respective Conditional Coupon Payment Date. No further payments will be made.

Redemption opportunities on the Redemption Date:

- If a Barrier Event has NOT occurred, the investor will receive EUR 1'000.00 (100% of the Denomination).
- If a Barrier Event has occurred, the investor will receive a round number (i.e. Conversion Ratio) of the Underlying with the Worst Performance per Product. Any potential fractional Conversion Ratio entitlements (Fractions of the Underlying) will be paid in cash, based on the Final Fixing Level.

A Barrier Event shall be deemed to occur if at least one of the Underlyings' Final Fixing Levels is at or below the respective Barrier Level.

The investor might incur a loss in case the sum of the value of the delivered shares on the Redemption Date, the Fractions of the Underlying and the coupon payment is below the purchase price of the product. Different from a direct investment in the Underlyings, the investor will receive a coupon payment, but no dividend payment nor any further entitlement resulting from the Underlyings (e.g. voting rights). The investor will not benefit from any increase of the market price of the Underlyings.

The Issuer may, with immediate effect, terminate the product if an extraordinary event occurs. Examples of extraordinary events include the loss of an Underlying, tax events and the discontinuation of the Issuer's ability to carry out the necessary hedging transactions. In this case, the Redemption Amount may possibly be significantly below the purchase price. Even a total loss of the investment is possible. The investor also bears the risk that the product will be called at an unfavourable point in time and the investor might only be able to reinvest the redemption amount on less favorable terms.

Intended retail investor

- The product is aimed at retail investors who intend to form private assets and have a short-term investment horizon.
- The investor can bear losses up to the total loss of the investment amount and attaches no importance to products with capital guarantee.
- **KNOWLEDGE & EXPERIENCE:** Investors who have at least one of the following characteristics: Some knowledge of the financial instruments in question; or moderate experience of financial markets.

2. What are the risks and what could the investor get in return?**Risk Indicator**

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Issuer is not able to pay the investor.

We have classified this product as 6 out of 7, which is the second-highest risk class.

This rates the potential losses from future performance at a high level, and poor market conditions are very likely to impact the capacity of the Issuer to pay the investor of the product.

The investor shall be aware of currency risk. The investor may receive payments in a different currency, so the final return that the investor will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so the investor could lose some or all of its investment.

In the case of delivery of the Underlying price losses may arise even after the Final Fixing Date until the Underlying is credited to the investors securities account.

If the Issuer is not able to redeem the investor what is owed, the investor could lose the entire investment.

However, the investor may benefit from a consumer protection scheme (see the section "3. What happens if the Issuer is unable to pay out?"). The indicator shown above does not consider this protection.

Performance Scenarios

Investment EUR 10,000		23/08/2019 (Recommended holding period)
Scenario		
Stress Scenario	What the investor might get back after costs	EUR 4424.56
	Average return each year	-55.07%
Unfavourable Scenario	What the investor might get back after costs	EUR 6576.84
	Average return each year	-33.71%
Moderate Scenario	What the investor might get back after costs	EUR 10266.71
	Average return each year	2.62%
Favourable Scenario	What the investor might get back after costs	EUR 10998.97
	Average return each year	9.79%

This table shows the money the investor could get back on the Redemption Date under different scenarios, assuming that the investor invests EUR 10,000.00.

The scenarios shown illustrate how the investor's investment could perform. The investor can compare them with scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of the product varies, and are not an exact indicator. What the investor gets back will vary depending on how the market performs and how long the investor keeps the investment/product.

The stress scenario shows what the investor might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay the investor.

The figures shown include all the costs of the product itself, but may not include all the costs that the investor pays to the advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect how much the investor gets back.

3. What happens if the Issuer is unable to pay out?

The obligations of the Issuer under this product are guaranteed by a first demand guarantee of EFG International AG, Zurich, governed by Swiss law, which protects investors in case the Issuer is unable to fulfil its obligations under the product. A total loss of the investor's capital invested is possible if both the Issuer and the Guarantor are unable to fulfil their obligations in respect of the product and the guarantee, respectively. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?**Cost over time**

The Reduction in Yield (RIY) shows what impact the total costs the investor pays will have on the investment return the investor might get. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown here are the cumulative costs of the product itself. They include potential early exit penalties. The figures assume the investor invests EUR 10,000. The figures are estimates and may change in the future.

The person selling to the investor or advising the investor about this product may charge other costs. If so, this person will provide the investor with information about these costs, and show the investor the impact that all costs will have on the investor's investment over time.

Investment EUR 10,000	If the investor cashes in at the end of the recommended holding period
Total costs	EUR 259.74
Impact on return (RIY) per year	2.68%

Composition of Costs

The table below shows:

- the impact each year of the different types of costs on the investment return the investor might get at the end of the recommended holding period.
- the meaning of the different cost categories.

This table shows the impact on return per year

One-off costs	Entry costs	2.68%	The impact of the costs the investor pays when entering the investment. The impact of the costs already included in the price. This is the most the investor will pay and could pay less.
	Exit costs	-	Not applicable
Ongoing costs	Portfolio transaction costs	-	Not applicable
	Other ongoing costs	-	Not applicable

Incidental costs	Performance fees	-	Not applicable
	Carried interests	-	Not applicable

5. How long should the investor hold it and can the investor take money out early?

Recommended holding period: 23/08/2019 (until Redemption Date)

The objective of the product is to provide the investor with the redemption profile described under "1. What is this product?" above. This only applies if the product is held until maturity.

There are no possibilities to take the investor's money out early other than to sell the product off-exchange.

In unusual market situations, or in the event of technical faults/disruptions, a purchase and/or sale of the product can be temporarily hindered, or may not be possible at all.

6. How can the investor complain?

Any complaint regarding the person advising on, or selling, the product on the relevant website can be submitted directly to that person.

Any complaint regarding the product or the conduct of the Issuer of this product can be submitted to the following address: Leonteq Securities AG, Europaallee 39, 8004 Zurich, Switzerland, kid@leonteq.com, www.leonteq.com.

7. Other relevant information

Any additional documentation in relation to the product and in particular the simplified prospectus and the programme (including any supplements hereto) are published on the website: www.leonteq.com.
